

When I lived in New York I used to watch the Metro Traffic and Weather channel every morning. Now that I am living in Florida I don't have that option. I have to put on the weather channel and hope their local weather is coming up or I may not see it for a half hour. When I heard they were going to have local traffic and weather on XM radio my exact words were , "They found a way to make XM even better." I am disgusted by the amount of censorship on MTV, I was tired of spending half of my 20 minute commute everyday listening to commercials on FM radio, and the price of cd's are a little outrageous for something I will be bored of in a week or two, thus making XM my best alternative for music. The fact that the government is trying to take XM's constitutional rights away are appalling. This is why an actor and a wrestler are able to become governor and why if Michael Jordan ran for president he would probablly win. And so, I urge you not to let the politicians infringe on more of our rights. We XM subscribers pay good money for our service, we deserve the best listening experience available. Thankyou for your time.
